

Muhammad Abu Hurairah

Full-Stack Developer (MERN | Django | AI Systems)

+92 311 6085400 | abuhurx@gmail.com | Portfolio | GitHub | LinkedIn

Summary

Full-Stack Developer specializing in MERN Stack, Django, and scalable backend systems. Experienced in building real-time applications, REST APIs, WebSockets, and production-grade SaaS platforms with clean architecture and performance optimization.

Education

University of Central Punjab (UCP)

BS Computer Science

2023 – 2027

Faisalabad, Pakistan

Punjab Group of Colleges

Intermediate in Computer Science

2021 – 2023

Faisalabad, Pakistan

Experience

MERN Stack Developer — Nexagen Solution

Aug 2025 – Oct 2025

- Built MERN-based travel and business management systems.
- Developed REST APIs, authentication systems, and backend workflows.
- Delivered production-ready applications deployed on Vercel.

Technical Skills

Languages: Python, JavaScript, TypeScript, SQL

Frontend: React.js, Next.js, Vue.js, React Native, Tailwind CSS

Backend: Django, Node.js, Express.js, FastAPI, WebSockets, REST APIs

Databases: MongoDB, PostgreSQL, MySQL, Prisma ORM

Tools: Git, Docker, Postman, Vercel, Linux, Cursor AI

Concepts: JWT Auth, RBAC, CI/CD, System Design, AI Agents, n8n Automation

Projects

FinScope — Crypto & Stock Analytics Dashboard

Next.js · WebSocket · Prisma · PostgreSQL

[🔗 Live](#) | [📄 GitHub](#)

- Built real-time crypto and stock analytics platform using WebSockets.
- Developed virtual trading system with \$100K simulated balance.
- Optimized database performance and authentication system.

NexGen — Meeting Scheduling Platform

React · Node.js · WebRTC · Socket.io

[🔗 Live](#) | [📄 GitHub](#)

- Built real-time WebRTC video conferencing system.
- Designed timezone-based scheduling system.
- Implemented role-based dashboards (User, Host, Admin).

DonorHub — Donation & NGO Platform

MERN Stack · JWT · MongoDB

 Live |  GitHub

- Built MERN donation platform with authentication system.
- Implemented OTP verification and real-time tracking.
- Designed scalable backend with MongoDB.

LoanVerse — Loan Management System

Django · React · PostgreSQL

 GitHub

- Built full-stack loan management system with admin workflow.
- Implemented 8% interest calculation and transaction system.
- Added automated email notifications for loan updates.

Certification
