Summary

Full-Stack Developer with hands-on experience shipping 20+ production web applications across the MERN stack, Django, FastAPI, and Next.js. Built real-time platforms with WebSockets and WebRTC, integrated agentic AI systems (LangGraph, Gemini API) into SaaS products, and streamlined business workflows with n8n.

Technical Skills

Languages

Python JavaScript TypeScript SQL

Frontend

React.js Next.js Vue.js React Native Tailwind CSS

Backend

Django Node.js Express.js FastAPI WebSockets REST APIs

Databases

MongoDB PostgreSQL MySQL Prisma ORM

AI & Automation

LangGraph Gemini API AI Agents n8n

Tools & DevOps

Git Docker Postman Vercel JWT Auth RBAC

Experience

MERN Stack Developer — Nexagen Solution

Aug 2025 – Oct 2025

- Built 5 MERN-based travel and business management systems, consolidating booking workflows into a single dashboard.
- Designed and shipped 15+ REST API endpoints covering authentication, role-based access, and core business logic.
- Delivered 5+ production-ready applications on Vercel, maintaining 100% uptime with zero-downtime releases across every deployment.

Education

University of Central Punjab (UCP)

2023 – 2027

BS Computer Science

Faisalabad, Pakistan

Punjab Group of Colleges

2021 – 2023

Intermediate in Computer Science

Faisalabad, Pakistan

Projects

Full-Stack (MERN / Next.js)

FinScope — Crypto & Stock Analytics Platform

Live | GitHub

Next.js 15 | TypeScript | Prisma | PostgreSQL | WebSocket

- Engineered a real-time crypto and stock analytics platform, streaming live market data via Binance and Finnhub WebSocket APIs into interactive TradingView-style charts.
- Developed a virtual paper-trading engine with a \$100K simulated portfolio and real-time P&L tracking, backed by Prisma ORM, PostgreSQL, and secure NextAuth.js authentication.

LeadGen Pro — AI Lead Generation & CRM

Live | GitHub

MERN | Apify API | Three.js | Nodemailer

- Architected a full-stack lead-generation CRM on the MERN stack, integrating the Apify API to scrape and aggregate Google Maps business data for faster prospecting.
- Created an analytics dashboard with a Three.js 3D globe visualization, filterable lead datasets, color-coded Excel exports, and templated Nodemailer email campaigns.

Nexagen — Meeting Scheduling Platform

Live | GitHub

MERN | WebRTC | Socket.IO | Google OAuth

- Architected a full-stack meeting scheduler with JWT authentication, Google OAuth, and role-based dashboards for users, hosts, and admins.
- Integrated WebRTC video calling and Socket.io for real-time booking updates, managing host availability, buffer times, and automated email notifications.

Frontend Applications

Hurairah Tools Kit — Privacy-First Utility Suite

Live | GitHub

Next.js | React | TypeScript | WebAssembly

- Developed 47 privacy-first, offline-capable browser utilities spanning PDF manipulation, image processing, developer tools, and academic productivity.
- Embedded WebAssembly for local AI background removal and client-side document generation; built a PWA-ready UI with Framer Motion and Zustand.

Glow Digital Insights — AI SEO Toolkit

Live | GitHub

React 19 | TanStack | Gemini API | Radix UI

- Built an AI-powered SEO toolkit with React 19 and the TanStack ecosystem, using the Gemini API to generate meta tags, blog titles, FAQs, and content briefs.
- Implemented client-side keyword clustering, readability analysis, and XML sitemap generation with a fully responsive, mobile-first UI.

Greenfield Gateway — Real Estate Platform

Live | GitHub

React 19 | TypeScript | TanStack | Tailwind CSS

- Crafted a real estate platform with server-side rendering and complex routing via TanStack Start and TanStack Router for optimal SEO and load speed.
- Delivered type-safe property valuation and contact workflows with React Hook Form and Zod, plus interactive dashboards using Recharts.

Agentic AI & Automation

HireLens — AI Career Advisory Platform

Live | GitHub

FastAPI | LangGraph | Gemini AI | PostgreSQL

- Orchestrated an 8-agent AI system with LangGraph and Gemini AI, powering resume analysis, ATS scoring, job matching, and mock interviews with token-by-token streaming.
- Established a FastAPI and SQLAlchemy backend with JWT authentication and Stripe billing, plus automated PDF generation with ReportLab for tailored resumes and cover letters.

HealthWise AI — Medical Assistant Chatbot

Live | GitHub

React | Vite | Gemini API | Tailwind CSS

- Crafted an AI medical assistant chatbot on React and Vite, integrating the Gemini API to deliver structured, easy-to-read health guidance in real time.
- Designed an interactive UI with dark mode, quick-topic suggestions, live typing indicators, and one-click copy-to-clipboard functionality.

Supportify AI — Telegram Support Automation

Live | GitHub

FastAPI | Gemini AI | PostgreSQL | n8n | React

- Constructed an AI customer-support agent powered by Gemini 2.0 Flash, handling order processing, intent detection, and complaint resolution via Telegram.
- Configured a React admin dashboard with real-time analytics and order tracking, backed by PostgreSQL and SQLAlchemy.
- Orchestrated webhook-driven workflows through n8n with rule-based fallback logic to guarantee uninterrupted service.
